

# ADVANCED GRADUAL INCREASE (CENTER-FLAT PEYOTE)

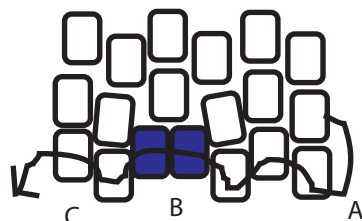

Copyright - 1993 - Barb Grainger

**ATTENTION:** Only the increase portion of the work has been shown here. Your actual piece will probably be much larger.

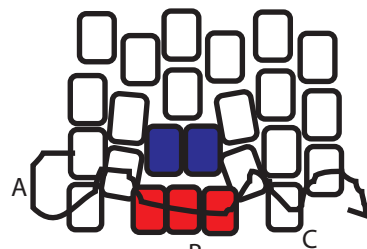

ROW 1 OF INCREASE:

Add two beads at the point of increase.

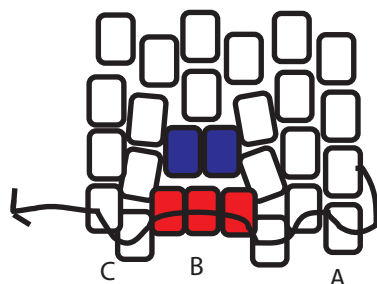

ROW 2 OF INCREASE:

- A. Turn row and work regular peyote until you reach the point of increase.
- B. Pick up one bead and pass needle through both beads of the increase..
- C. Work normal peyote for rest of row..

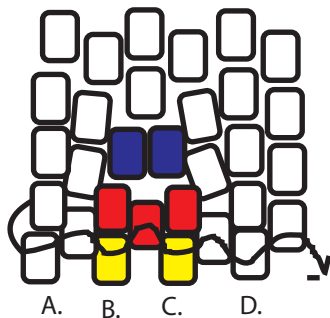

ROW 3 OF INCREASE:

- A. Turn row and work regular peyote until you reach the point of increase..
- B. Add 3 beads at the point of increase.
- C. Work normal peyote for rest of row.

ROW 4 OF INCREASE:

- A. Work regular peyote up to the point of increase.
- B. When you reach the 3-bead increase, go through all three beads as if they are one.
- C. Continue regular peyote to the end of the row.

ROW 5 OF INCREASE:

- A. Turn row and work normal peyote until you reach the point of increase.
- B. Pick up one bead and pass needle through the second bead of the three-bead increase..
- C. Pick up one bead, skip the next bead of the three-bead increase and pass the needle through the next available bead of previous row.
- D. Work normal peyote for rest of row.

**Hint:** You may learn a technique quicker if you color code the process as I have here by using different colored beads for each row. However, use the colored beads only at the point of increase. This causes the individual increase steps to stand out so you can see and understand them quickly. I strongly suggest you make a sample piece so you can learn the technique before you use it in an actual project. Enjoy! Barb Grainger
